Si-30

Piston Pump

Sauermann® part#: SI30CE02UN23

Versatile technology

The high performance Si-30 is suitable for air-conditioning units up to 20 kW. The piston technology is specifically designed for removing condensates from air conditioning systems. The Si-30 is fully reliable, in any kind of environment. Its operating sound level will remain silent whatever the volume of condensates.

Benefits

Patented technology

- Increased performance: Only one pump, for air conditioning unit up to 20 kW.
- High resistance to pollution created by general environment. Capable of discharging small particles.
- Proven Reliability.
- The Drain Safe Device retains prime and prolongs the pump life.

Silent

- Quiet in operation: 20 dBA independently tested.
- The size of the air-conditioning unit and volume of condensates to be removed does not affect the operational sound level of the pump.
- Mounting bracket specifically designed to reduce vibration transmission to the wall / panel or pipework.

Energy saving

- Improved performance and high flow rate reduce operation time and energy consumption.

Easy to install

- Compact design.
- Mounting bracket: allows the pump to be wall mounted or hung from ceilings and pipework.
- Lockable plug-in power cord to avoid unintended disconnection.
