

PROFESSIONAL SOLUTIONS FOR CONDENSATE MANAGEMENT AND INDOOR AIR QUALITY MEASUREMENT

ABOUT US

For more than 45 years, Sauermann Group has designed, manufactured and sold products and services dedicated to the industrial and HVACR markets. The Group specifically focuses on the detection, measurement and control of indoor air quality (IAQ).

HIGH ACCURACY UNMATCHED RELIABILITY MULTIPLE APPLICATIONS

Measurement instruments: Sauermann measurement instruments monitor a broad spectrum of indoor air quality parameters and serve a wide range of applications, from building ventilation (heating and air conditioning) systems, to cold-chain installations and combustion gas analysis. Backed by our testing laboratories and in-house research and development programme, Sauermann instruments deliver the accuracy and reliability that HVACR engineers need.

LOW SOUND LEVEL LOW FAIL RATE HIGH PERFORMANCE **Condensate management solutions:** Safe and effective condensate management for air quality systems can be a challenge. Sauermann pumps are designed to look good, while our patented piston technology delivers whisper-quiet operation and unrivalled reliability.

OUR PRODUCTS & MARKETS

Climate systems engineering: Heating & air conditioning installers, inspection bodies, technical consulting firms, air treatment unit manufacturers, system tuners, operation & maintenance contractors, etc.

High-tech industries: Pharmaceutical & cosmetics laboratories, electronics manufacturers, etc.

Heavy industries: Food processing, paper, automotive, nuclear, etc. **Commercial**: Hospitals, glasshouses, museums, farms, temperature-controlled transport, etc.

OUR EXPERTISE

ACCREDITED MEASUREMENT LABORATORIES, IN-HOUSE RE-SEARCH AND DEVELOPMENT

Sauermann products and services are backed by cuttingedge facilities and expertise: a team of over 20 experts working at multiple testing and calibration laboratories worldwide, and production lines in France, the United States and China.

Our in-house research and development programme – spearheaded by a young, forward-looking group of 20 engineers and 10 technicians – has three aims: to push the boundaries of innovation in ergonomic design, digital technology and connected objects, to patent our technologies, and to consistently set new standards for electronic and mechanical performance in our products.

Over 20 patents, including our oscillating piston pump technology and the foldable frame system found on our DBM 620 air flow meter.

Over 800 sq m of laboratory space

Our experts provide adjustment and calibration services for our measurement instruments

Customer service staff trained by our experts

Our team is here to advise and quote you for the service you need.

After-sales service within our production lines

Our technicians maintain and repair your devices right where they're made.

Our measurement expertise covers a wide range of fields:

Pressure	Weighing	Air velocity	Light measurement
Temperature	Radiometry	Air flow	Electrical current
Humidity	Tachometry	Gas analysis	Acoustics

Sauermann Industrie, Laboratories, located in Montpon (FR), accredited to standard NF EN ISO/ IEC 17025

HVACR MEASUREMENT INSTRUMENTS

Sauermann's measurement instruments are backed by a 45-year track record in metrology, delivering unmatched reliability and a user experience that's second to none.

At Sauermann, our experience means we understand the needs of professionals the world over — and design tools to help them do their job better. Our instruments monitor the full spectrum of air quality parameters, catering to the entire HVACR and indoor air quality sector.

DIGITAL MANIFOLDS

HVACR measurement instruments

It's all about simplicity

Pressure / Temperature / Humidity / Air velocity / Air flow rate

Our portable HVACR instruments cover a broad spectrum of measurements, from temperature, relative humidity and pressure, to air velocity and air flow rate.

We offer a full range of easy-to-use instruments: dual input thermometer (Si-TT3), infrared thermometer (Si-TI3), thermo-hygrometer (Si-HH3), digital differential pressure manometer (Si-PM3), vane thermo-anemometer (Si-VV3), hotwire thermo-anemometer (Si-VH3), gas leak detector (Si-CD3) and refrigerant leak detector (Si-RD3).

What's more, our user-friendly Si-HVACR Measurement MobileApp displays measurement data right on your smartphone or tablet.

Mobile app Si-HVACR Measurement MobileApp

With the Si-HVACR Measurement MobileApp, users can view and record measurements in real time.

Key features:

- View parameters in user-friendly format
- Access previously saved measurements and charts (average, min. & max. values, etc.)
- Generate reports (PDF, CSV or XML) and add up to four photos

Backlit LCD screen

Low consumption device

Magnetic backing for easy fixing

Carrying bag

Calculated values on mobile app

Applications

Our devices provide everything HVACR engineers need for their routine operations

Ventilation Air conditioning

Refrigeration

	Heating	ventilation Air conditioning	Refrigeration				
	Gas-fired boilers	Ventilation circuit					
	- Measure pressure at the gas inlet valve. - Measure pressure drop (draught) at the flue.	- Check filter fouling. - Measure extractor fan pressure and air flow rate. - Measure air flow in a pipe.					
Si-PM3 Digital differential pressure manometer	Tip : Connect a Pitot tube to the instrument to	to measure air flow in a pipe. Use the smartphone pipe coefficient.	app to calculate air flow rate by entering the				
	Hot water boilers	Multifunction	Refrigerators, freezers				
	- Compare the water temperature in the boiler inlet, outlet and return pipes.	- Ambient air temperature. - Air temperature in the pipes. - Temperature in domestic hot water systems.	- Measure superheat and sub-cooling of the refrigerant gas circuit.				
Si-TT3 Dual input thermocouple thermometer	Tip : A vital add-on for working	g on refrigeration systems if your manifold does no	ot include a temperature probe.				
	Radiators						
	Measure radiator hot and cold spots to determine if venting is required.						
Si-TI3 Infrared thermometer	Tip : Vastly improves speed and convenience (measurements delivered remotely in real time). Can measure ambient temperature (via app). Capable of checking various temperature increases, including electrical heating. Affix a black strip on non-black surfaces and adjust the emissivity of the surface (as per the manual) for accurate measurement.						
		Ventilation					
		- Measure ambient air temperature and relative humidity.					
Si-HH3 Thermo-hygrometer	Tip : Extreme relative humidity values (too high or too low) can pose hazards (allergies, germs, dust, mould, etc.). The app displays psychometric parameters such as dew point and wet bulb temperature.						
€		Air conditioning circuit					
Si-VV3		- Measure air flow through system inlet and outlet grilles.					
Vane thermo- anemometer	Tip : Input the pipe cross-s	ection in the app to calculate average air flow rate	e in addition to air velocity.				
0		Air conditioning circuit					
•		- Measure air flow in pipes (and temperature).					
Si-VH3 Hotwire thermo-anemometer		is in the app to calculate average air flow rate in a ead of a vane thermo-anemometer for low-velocit					
	Gas-fired boilers						
502	Detects leaks of combustible gases upstream of the boiler, at the inlet and inside the unit.						
Si-CD3 Gas leak detector	Tip: A flexible probe keeps the device's sensor in contact with gas pipes in even the hardest-to-reach places. Pay special attention to joints in the circuit. Check the condition of the filter and replace it if necessary. Follow the manufacturer's recommendations for replacing the sensor.						
	Heat pumps	Air-conditioning units	Refrigerators, freezers				
	Dete	cts refrigerant leaks in every part of the cooling ci	rcuit.				
Si-RD3 Refrigerant leak detector	Pay special attention to joi	e device's sensor in contact with gas pipes in ever nts in the circuit. Check the condition of the filter e manufacturer's recommendations for replacing t	and replace it if necessary.				

Si-PM3

Digital differential pressure manometer

This pocket-sized manometer can take two pressure measurements simultaneously, and you can connect a Pitot tube to measure air velocity and flow rate in a pipe.

Reference: SIPM3

Air velocity and air flow with Pitot tube (optional)

Measuring range: -150 to +150 hPa (-60 to 60 inH₂O)

SI-TT3

Dual input thermocouple thermometer

This instrument uses thermocouple technology to take two temperature readings at once (between -200°C and 1,300°C). Ideal for checking the inlet and outlet temperatures of water heating systems.

Reference: SITT3

Dual channel K thermocouple (2 probes included)

Si-HH3

Thermo-hygrometer

This thermo-hygrometer is a turnkey solution for measuring temperature and relative humidity, while dew point and wet bulb temperature are calculated via the accompanying mobile app.

Reference: SIHH3

Measuring range: from 0 to 100%RH

SI-TI3

Infrared thermometer

Sauermann's Si-TI3 infrared thermometer is the ideal solution for contactless diagnosis, inspection and checking of surface temperatures.

Reference: SITI3

Optical: D.S 12:1

SI-VH3

Hotwire thermo-anemometer with telescopic probe

Sauermann's palm-sized Si-VH3 hotwire thermo-anemometer comes with a highly sensitive and accurate telescopic probe that easily measures air flow rate, velocity and temperature.

Reference: SIVH3

80 cm (31.5") telescopic probe with double graduation

Vane thermo-anemometer with built-in vane probe

This thermo-anemometer, which features a vane probe with a long cable, can be used to measure air velocity and temperature at an air vent. Air flow rate is calculated via the accompanying mobile app.

Reference: SIVV3

Air velocity and air flow meter

Large vane probe with 2 m (78.74") cable

15031

Si-CD3

Gas leak detector

The Si-CD3 gas leak detector is perfect for quickly and easily detecting even the slightest leaks of various combustible gases (methane, propane, isobutane, LPG and other hydrocarbons).

Reference: SICD3

30 cm flexible probe

Adjustable alarm

SI-RD3

Refrigerant leak detector

The Si-RD3 refrigerant leak detector uncovers leaks of most common refrigerant gases to a high degree of sensitivity, including all HCFC and HFC refrigerants, R1234yf, R1234ze, R290, R600a, and 5% hydrogen—95% nitrogen mixtures (Nidron 5 and Trace-A-Gas).

Reference: SIRD3

30 cm flexible probe

Visual and audio alarm

Combustion gas analyzers

A new degree of efficiency

Sauermann offers a range of compact and intuitive analysers to enhance your performance.

Sauermann's combustion gas analyzers feature the latest digital and metrology technologies, making measurements more reliable and cutting the amount of time heating engineers need to spend on-site. A user experience like no other!

Applications

SI-CA 030

All the essentials for combustion gas analysis

The Si-CA 030 offers everything heating engineers need to inspect and maintain residential and commercial boilers, with wireless connection to our smartphone app and automatic generation of servicing reports and certificates.

Common features Si-CA 030 / Si-CA 130

- Predictive maintenance with estimated sensor life & calibration reminders
- Draft & differential pressure measurements
- Calculated CO₂% value
- CO safety monitoring in ambient air

CO measurement up to 8,000 ppm

Color display

SI-CA 130

Comprehensive, versatile analyzer with touch-screen display

The Si-CA 130 features a touch-screen display and comes with PC-based management software (in addition to the smartphone app) for more in-depth combustion gas analysis. The three field-replaceable cells and sensors offer expanded measurement capability.

Up to three gas sensors O₂, CO, and NO or Low NO (for NOx)

Field replaceable precalibrated sensors

- Auto pump cut-off for high CO levels (user-adjustable)
- NOx capable with NO sensor (optional)
- One Touch Pump On/Off with Purge
- · PC software with wireless and USB connectivity
- · Graphical data display
- · Customisable gas analysis screen

- · Combustion efficiency and excess air calculations
- Protective rubber casing
- Maintenance agreements and extended warranties available
- Emissions values adjusted for reference O,

Data management with automatic logging & report creation trough app/PC software

Lightweight, only 350 g (12 oz)

SI-CA 230

State-of-the-art, industrial emissions analyzer

With up to six gas sensors and expanded measurement capabilities, the Si-CA 230 is well suited for boilers, burners, engines, and other industrial combustion applications. And with support for more gases and a high CO tolerance threshold, its versatility makes it the ideal choice across commercial and industrial applications.

Up to Six Gas Sensors. Can inlcude O_2 , CO, NO, Low NO, NO_2 , Low NO_2 , SO_2 , Low SO_2 , H_2S , and CxHy

CO Dilution auto-range with measurements to 50,000 ppm

Total NOx & Low NOx Capable

Field Replaceable Pre-Calibrated Sensors

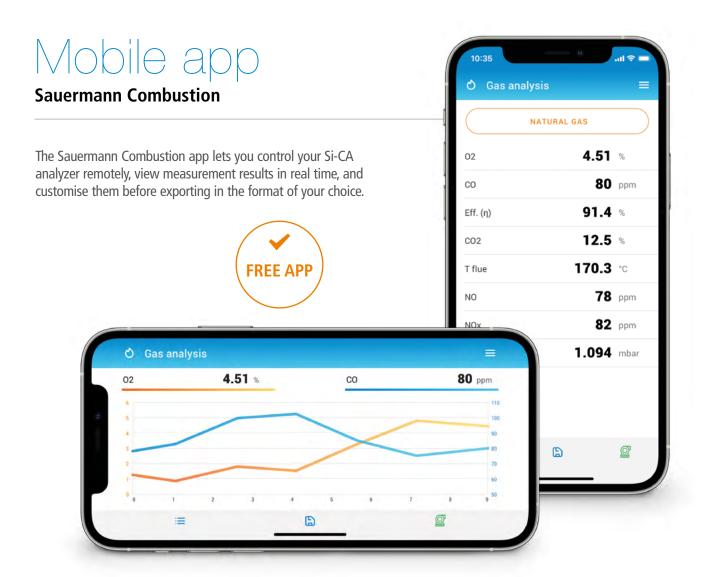

Features: Si-CA 230

- Ergonomic, light weight, & durable design
- Data management with automatic logging & report creation
- Predictive maintenance with estimated sensor life & calibration reminders
- One touch pump On/Off with purge
- PC software with wireless and USB connectivity
- · Auto pump cut-off for high CO levels
- Graphical data display
- · Customisable gas analysis screen
- · Stack gas velocity with Pitot tube
- Draft and differential pressure measurements
- Emissions values adjusted for reference O,
- · CO safety monitoring in ambient air
- · Protective rubber holster
- Maintenance contracts and extended warranties available

- Free apps for iOS & Android mobile devices
- PC software with USB & wireless connectivity
- Fast, easy wireless connection
- Remote live view of combustion analysis data as list or graph
- · Remote control to change settings
- Data saving, including automatic logging
- Report creation in PDF, CSV (for Excel) and XML formats
- Databases for customers, operators, & equipment

Download Sauermann Combustion app

Warranty

All devices come with a two-year warranty against manufacturing defects (subject to assessment by our after-sales department).

To find out more about our extended warranties and maintenance plans, please visit our website, or contact our Customer Service Department.

Digital manifold

The future of climate systems engineering

Vacuum / Temperature / Pressure

Countries around the world are constantly tightening regulations on refrigerants in an effort to protect the planet. When it comes to complying with these rules, refrigeration engineers are on the front line. And the manifold is their instrument of choice.

Our digital manifold and vacuum probes combine the capabilities of multiple instruments into one, significantly reducing the size of engineers' toolboxes.

With their user-friendly design and ability to capture and report multiple parameters at once on a mobile app, these instruments are the all-in-one solution that HVACR specialists need.

Product overview

The ultimate all-in-one solution

TAKE COOLING UNIT MEASUREMENTS WITH THE SI-RM3

MEASURE EVACUATION WITH THE SI-RV3 VACUUM PROBE

PERFORM CHECKS WITH THE SI-RM13 COMBINED MANIFOLD

GENERATE REPORTS AND CAPTURE PHOTOS WITH THE MOBILE APP

Si-RM3

Smart wireless manifold probes with dual valves

Si-RV3

Smart wireless vacuum probe with dual valves

Si-RM13

Combined manifold with smart wireless probes and 2-channel by-pass

Si-Manifold Mobile app

Si-RM3

Smart wireless manifold probes with dual valves

The new Si-RM3 digital manifold from Sauermann provides installers with an ergonomic tool that fits into tight and compact places, an Si-Manifold app with wireless connectivity up to a range of 30 metres, and the ability to take a number of important readings in an all-in-one device.

It includes two pressure probes that precisely measure high side and low side pressure (from -1 to 60 bar) and instantly display the condensation/evaporation temperatures for up to 126 refrigerants on the Si-Manifold App, including new low global warming potential (GWP) and natural refrigerants.

Two temperature probes are used to accurately and simultaneously provide real-time superheat/subcooling calculations on the Si-Manifold app during the refrigeration process. A second connector allows for the charging and discharging of the refrigerant, and a built-in Schrader® core avoids leakages when you connect the hose.

Reference: 25555

Convenient design

Built-in Schrader® core

Accurate measurement of high and low pressure

Real-time superheat and subcooling calculations

Measurement during charging

Wireless connectivity (range up to 30 metres)

Accurate measurements of high and low pressure

Two pressure probes make this possible and provide condensation/evaporation temperatures.

Measurement during charging

A second connection allows charging of the system, and the built-in Schrader® core prevents leaks during connection/disconnects.

Real time superheat and subcooling calculations

Two temperature probes used with the Si-Manifold app make this possible and eliminate the need for manual calculations.

Technical data

	Si-RM1
Measuring range	-1 to 60 bar
Pressure sensing accuracy	±0.5% of full scale
Overload	65 bar
Burst pressure	150 bar
Battery life	250 h
Protection	IP54

	Si-RM2
Measuring range	-40 to 150°C
Temperature accuracy	±1.3°C
Temperature sensor	High-accuracy NTC thermistor
Pipe diameter	6 to 42 mm
Cable	2 m length
Protection	IP54

VACUUM MEASUREMENT

Heating

SI-RV3

Smart wireless vacuum probe with dual valves

Sauermann's Si-RV3 vacuum probe supports the quick, safe evacuation of refrigeration systems and heat pumps with highly accurate measurements.

It has an ergonomic design, an excellent Si-Manifold app with wireless connectivity up to a range of 30 metres, and a high-precision Pirani® sensor that provides deep vacuum measurements.

It also provides H2O evaporation temperature on the Si-Manifold app in real time.

A second connector allows for the discharging of the refrigerant, and a built-in Schrader® core avoids any gas leakages when you connect the hose.

COMBINED MANIFOLD

Heating Refrigeration

SI-RM13

Combined manifold with smart wireless probes and 2-channel by-pass

Sauermann's Si-RM13 combines the sturdiness of the analogue manifold with the Si-RM3's smart wireless manifold probes.

In this premium package, installers can take advantage of both devices.

It includes a traditional 2-channel analogue manifold body (by-pass type) with flexible hoses and a durable block made of anodized aluminium.

Installers can also utilize the numerous benefits from the smart wireless manifold probes for pressure and temperature measurements, as well as the Si-Manifold App.

Si-Manifold

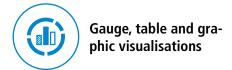

All-in-one mobile app

The Si-Manifold app for iOS and Android provides wireless connectivity up to a range of 30 metres. It has the ability to store and update up to 126 refrigerants, including environmentally-friendly low global warming potential (GWP) and natural refrigerants.

Pressure, condensation/evaporation, pipe, and ambient temperatures are instantly provided on the Si-Manifold app, as are vacuometer measurements. Providing these measurements eliminates the need for manual calculations.

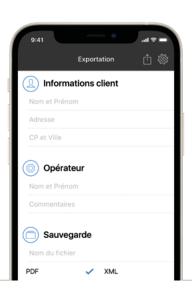

Everything you need in one app

- Data logging
- Tightness test
- Pressure target settings
- Vacuum function
- · Heating and cooling functions
- etc.

User friendly

Easy-to-read digital gauge, table and graphic visualisations.

Save and export

- Export reports in PDF, CSV and XML formats for sending by email.
- Dataset can be saved and restarted. This function is very useful for long operations.

MINI PUMPS

TANK PUMPS

Our condensate removal pumps feature a cutting-edge design that makes them global best-sellers.

Sauermann pumps are compatible with all condensate-generating systems, from domestic air conditioning units to powerful industrial-grade combustion boilers. Drawing on 45 years of experience in designing condensate removal pumps, our R&D team has developed a range of products that strike the perfect balance between versatility, flexibility, power and reliability.

Mini pumps

Exclusive technology, unmatched reliability

Detect and remove condensates from air conditioning units

Our mini pumps feature an exclusive, patented electromagnetic piston technology that sets the gold standard for reliability and whisper-quiet operation.

Our range is compatible with all types of indoor and outdoor system, including all console, split and cassette-type air conditioning units. All our condensate removal pumps are discreet in design, quick and easy to maintain and built to last.

DELTA PACK

For wall-mounted air conditioning units

The Delta Pack includes an elbow design that can be easily opened by hand by a simple finger push — no tool is needed. Its streamlined design complements wall-mounted air conditioning units. It includes the Si-10 Univers'L pump, which incorporates Sauermann's latest piston pump technology. The whisper-quiet pump also comes with insulating foam inside the corner piece and on the pre-installed drain pipe.

Whisper-quiet operation

DELTA PACK kit content

Si-10 Univers'L piston pump - Clear PVC tube (int. Ø 6 mm, L: 1 m, foam-insulated over 800 mm), fitted with a "drain safe device" connector - 1.5 m lockable plug-in power cable, with 2 power wires and 2 NC safety contact wires - 2-part elbow - Ceiling duct cover - Rubber elbow/split gasket - 650 mm rubber tube (int. Ø 15 mm) - Vent pipe - 6 screws and plugs for fixing duct and elbow - 4 double wire clamps Ø 16 mm, 1 double wire clamp Ø 6 mm - 750 mm duct, 80 x 60 mm.

SI-10 UNIVERS'L

Replacement pump for trunking corner pieces

For wall-mounted and floor-standing air conditioning units

The Si-10 Univers'L can replace the majority of corner piece-mounted pumps. It is also suitable as a replacement for Sauermann's Si-10 and SI 1082 models.

Reference: SI10CE03UN23

Technical data

	Si- 10 UNIVERS'L		
Maximum flow rate	20 l/h		
Maximum discharge head	10 m (flow rate = 4 l/h)		
Pump sound level at 1 m	22 dBA		
Detection levels (mm)	ON: 16, OFF: 11, Safety: 19		
Mains supply	230 V ~ 50 Hz 14 W		
Thermal protection	115°C (auto-reset)		
Protection	IPX4		

OMEGA PACK

Under-unit installation for wall-mounted air conditioners

The Omega Pack is designed for installation under a mini-split air conditioning unit. The onboard Si-20 pump features Sauermann's latest technology for proven reliability, while the pack comes with the full range of installation accessories including an anti-siphon device for hydraulic connection you can trust.

The white box matches the colouring of the latest-generation wall-mounted air conditioning units.

OMEGA PACK kit content

Si-20 piston pump with anti-vibration rubber dampers - Clear PVC tubing (int. \emptyset 6 mm, L: 60 mm), fitted with a pre-mounted "drain safe device" connector - Detection unit with installation kit (90° rubber elbow, 3 double wire clamps, 3 tie wraps) - Power cable with NC safety contact wire - Shell (2-part: backplate and cover) - Screws and plugs for affixing backplate.

$S \mid -20$ Piston pump

The slim design of the Si-20 allows it to easily fit inside most air conditioning units. It can also be installed alongside the unit inside trunking. The pump is fitted with exclusive dampers designed to reduce noise caused by vibration.

Technical data

	Si-20			
Maximum flow rate	20 l/h			
Maximum discharge head	10 m (flow rate = 4 l/h)			
Pump sound level at 1 m*	22 dBA			
Detection levels (mm)	ON: 16, OFF: 11, Safety: 19			
Mains supply	230 V ~ 50 Hz 14 W			
Thermal protection	115°C (auto-reset)			
Protection	IP20			

Si-30 / Si-33

Mini pumps with float detection

The pump mechanism inside the Si-30 and Si-33 models is specially designed by Sauermann to remove condensates produced by air conditioning units.

References:

Si-30: SI30CE01UN23 Si-33: SI33CE01UN23

Patented Sauermann technology, specifically designed for removing condensates from air conditioning systems.

The pre-installed anti-siphon connector eliminates the risk of siphoning.

The mounting plate means the pump can be mounted on a wall, hung on the ceiling or affixed directly to a pipe.

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.

Kit content

Pump - Clear PVC tubing (int. Ø 6 mm, L: 1 m), fitted with a pre-mounted "drain safe device" connector - Anti-vibration mounting bracket - 1.5

m lockable plug-in power cable with NC safety contact wires - 6 tie wraps - Detection unit (SI2958) with installation kit: rubber elbow 90° (int. Ø 15 mm, L: 60 mm), vent tube, mounting rail, adhesive.

Si-60

For ducted air conditioning systems and cabinet coolers

The Si-60 pump with built-in tank (0.37 L) is suitable for air conditioning units up to 20 kW. This pump is equipped with Sauermann's piston pump technology specifically designed for removing condensates, and with a reliable anti-clogging detection system for use in all types of environment. Its compact, sleek design makes it a breeze to handle, while the wide range of hydraulic connectors means this pump is easy to install in any location.

Reference: SI60CE01UN23

Twist-lock power cable for secure connection.

Reliable anti-clogging detection system for use in all types of environment.

Top and bottom condensate inlet. Can also be installed directly in the tray.

Lockable cable

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application.

Suitable as a replacement for an EE 1650 model.

PE 5000 / PE 5100

Peristaltic pumps for wall-mounted split units, suspended ceiling units, ducted units and cabinet coolers up to 8 kW

These peristaltic pumps are among the most compact models money can buy. They combine whisper-quiet operation with practical and clever design features: the detachable and replaceable head (PE 5001) and tubes (PE 5002) reduce maintenance work and cost.

The PE 5000 is controlled by a signal from the air conditioning compressor.

The PE 5100 is equipped with two temperature probes. The PE 5200 is controlled by a remote detection unit fitted with a 3-level float (on/off/alarm).

Tank pumps Powerful and built to last

For managing large volumes of condensate

Sauermann tank pumps are built for power and durability, so they can withstand even the toughest conditions.

Our tank pumps are specially designed for high-powered air conditioning, heating and refrigeration systems that generate large volumes of condensate. They're also built to handle hot, acidic, biofilmheavy and other special types of condensate.

Applications Keep complex systems protected

Mains supply	230 V ~ 50/60 Hz - 70 W
Protection	IP20

*According to EN ISO 3744. Measured at LNE lab, pump operating with water, out of application. Suitable as a replacement for the SI 1800 and SI 1805 models.

Heating

Air conditioning

For domestic air conditioning systems and domestic gas-fired condensing boilers

The Si-83 is more compact than any other pump in its class. With five condensate inlet options and a slimline profile (just 129 mm), it's ideal for installing under domestic gasfired condensing boilers (up to 40 kW). The SI83CE43UN23 model comes with a neutralization cartridge that effectively neutralizes the acidic condensates produced by domestic gas-fired condensing boilers. The versatile Si-83 pump is also perfect for domestic air conditioning systems (up to 20 kW).

The pump even comes with its very own smartphone app — the Si-83 MobileApp — that makes installation both simple and intuitive.

Air conditioning

For cassette, multi-cassette and ducted air conditioning systems, small refrigerated display cabinets and gas-fired condensing boilers

The SI 1805 is designed for easy installation in any conditions.

The pump can remove up to 500 litres per hour, making it ideal for air conditioning and refrigeration systems. The robust SI 1805 pump easily withstands the charged, high-temperature and acidic (pH > 3.4) condensates produced by gas-fired condensing boilers.

Si-1830 / SI 1850

For oil-fired condensing boilers

The Si-1830 is built for use in the toughest conditions. It easily withstands the charged (e.g. oil residues), hot and highly acidic condensates produced by oil-fired condensing boilers.

Its watertight case protects the motor from acidic fumes and water splashes.

The Si-1830 can also be installed without its tank, directly in the condensate tray.

The 3.8 litre tank means the SI 1850 can remove up to 1,100 litres per hour, making it suitable for high-powered air conditioning and refrigeration systems. The robust SI 1850 pump easily withstands the charged, high-temperature condensates produced by gas-fired condensing boilers.

SI-2052

Maintenance kit for cassette-type systems with centrifugal pump

The SI 2052 pump can be used as a replacement for some Sauermann pumps installed in series on cassette-type and ceiling-mounted air conditioning units up to 20 kW.

The centrifugal technology inside this pump is specially designed to remove condensates quietly and continuously in any type of environment. The single-level detection unit can be used as a safety contact (NC) to cut off the air conditioning system compressor or solenoid valve automatically.

Reference: SI2052SIUN23

Compatible with most market-standard models

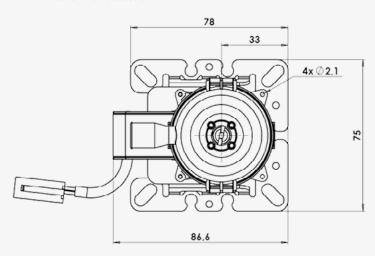

Wire-to-wire connector

Kit content

Centrifugal pump - 250 mm overmoulded cable - 850 mm cable with wire-to-wire connector - High level safety detection unit (DET01550, 900 mm cable) - Stainless steel screw for detection unit.

Technical data

	SI 2052
Maximum flow rate	100 l/h at 200 mm
Maximum discharge head	0.9 m (24l/h)
Pump sound level at 1 m*	≤ 30 dBA
Detection levels (mm)	Safety: 18
Consommation électrique	230 V ~ 50/60 Hz - 14 W

Si-1931

Dairy pump for refrigerated display cabinets

Specially designed to handle condensate from supermarket refrigerated display cabinets, the Si-1931 pump also offers a proven solution against the formation of biofilm with its Gel-clear tablet.

The compact design of the pump facilitates installation under low-slung display cabinets.

- · Ultra-flat profile: 80 mm high.
- Three inlet points: top, right or left.
- · Keeps the condensate drain clear.
- Reduces water leaks by more than 90%.
- Preventing the formation of biofilm reduces the risk of water leaks and extends pump life.

Reference: SI1931CE01EU23

Dairy pump with a power cable (NO safety contact) and a 13 mm outlet - Rubber bellows inlet adapter, 32, 40 and 50 mm int. \varnothing - Outlet adapter, 10 mm \varnothing - Hard plastic inlet adapter, 40 mm \varnothing - 2 Gel-clear tablets.

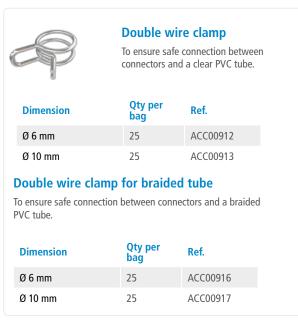

Technical data

	Si-1931
Flow rate at 6 m	700 l/h
Maximum discharge head	24,6m
Protection	IP20
Pump dimensions	L 610 x W 235 x H 80 mm
Tank volume	6.5 l

Accessories

Accessories suitable for all makes and applications

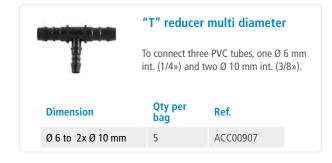

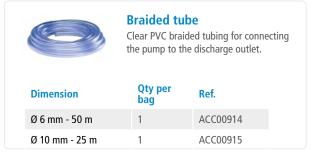

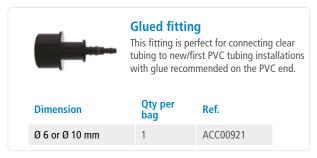

A		device is no siphoning effect and p will not run dry and stop
Dimension	Qty per bag	Ref.
Ø 6 mm	5	ACC00922
Ø 10 mm	5	ACC00923

Detection mini pumps

Centrifugal pumps

Push fit fitting tank connec-

To channel condensate through the side of the tank. For 32 mm (1" 1/4) tubes

Dimension	Qty per bag	Ref.
Ø 32 mm	1	ACC00940

Rubber condensate inlet adapter

To channel condensate into a tank pump through a PVC tube.

Dimension	Qty per bag	Ref.
Ø 25 to Ø 20 mm	3	ACC00936
Ø 32 to Ø 20 mm	3	ACC00937
Ø 40 to Ø 20 mm	3	ACC00938

Anti-biofilm

pH Safe 1

Neutralization cartridge for use with the Si-82 and Si-83 pumps to effectively neutralize the condensates produced by gas-fired condensing boilers. Capable of neutralizing up to 800 litres of acidic condensates per year at pH3.

Dimension	Qty per bag	Ref.
-	1	PH0100SIUN23

pH Safe 2

For neutralizing the condensates produced by gas-fired condensing boilers. Capable of neutralizing up to 6 litres of acidic condensates per hour at pH3.

bag	Ref.
- 1	PH02CE01UN00
